

YOUR REFERENCE IN LIFE SCIENCE

Intersource Ingredients LLC is the Saudi arm of a multinational company (Fadel Group) founded in 1936 and is specialized in the distribution of food, pharma, dietary supplements and cosmetics ingredients in Middle East Africa region.

We are the valued partners of DSM Firmenich in Saudi Arabia with offices in Riyadh, Jeddah and Dammam covering the food, pharma and personal care industrial segments.

Our team of experts are locally available to accompany our customer's projects from product inception to final product development. We offer a full range of ingredients and provide solutions and services that assist our customers in their go-to-market strategy. Our products and solution offerings are intended to deliver nutritional benefits and health claims with a unique market positioning.

The product range is tailored to each market segment as follows:

FOOD & BEVERAGE

PHARMA AND DIETARY SUPPLEMENTS

EARLY LIFE NUTRITION

PERSONAL CARE

Food & Beverage

Natural Coloration

Beta Carotene (1%, 5% and 10%) – both water and oil-soluble versions
Lycopene
Apocarotenal

Fortification

Our premixes whether standardized or tailor-made include vitamins, minerals, amino-acids, oligosaccharides, inulin, sweeteners, flavors and much more... They address nutritional deficiencies by providing the nutritional needs for each population group based on age, gender, medical condition, and lifestyle.

Preservation

Most food and beverage products need to be guarded from moulds, yeasts and fungi for shelf-life and food safety considerations. They create off-tastes and discoloration damaging food and beverage products. Others like oils might oxidize and cause rancidity.

[Here are some solutions in our portfolio](#)

DI-alpha tocopherol | Mixed tocopherols | Ascorbic Acid | Nisin
Natamycin | Sodium Benzoate
Potassium Sorbate

Stabilization

Most food and beverage products require stabilization over their shelf lives to avoid separation or precipitation and ensure stable texture. Hydrocolloids and texturizers in our range provide stabilization solutions. We offer different types for various food applications with specific technical parameters:

Pectins | Gellan Gum | Xanthan gum
CMC | Guar Gum

Dairy-related ingredients

Fresh dairy, cheese, yoghurts, dairy desserts and fermented products as well as non-dairy alternatives all use a number of ingredients for taste and texture. We offer a full range of dairy ingredients that give the final products its identity:

Starter cultures (lyophilized and frozen)
Bio-protective cultures
Enzymes (lactase) | Coagulants (Rennets)

Bakery-related ingredients

Bakeries are concerned about dough quality, shelf-life, texture, bread volume, and other aspects of the baking process. Different bread applications require specific bread improvers and baking ingredients to stand out on the shelves.

Arabi bread, baguette, burger buns, loaf bread, muffins, doughnuts, Cinnamon buns or pizzas have different needs. Our wide range of baking ingredients respond to the variety of bread applications:

Alpha-Amylase (fungal and bacterial) | Glucose Oxidase

Protease | Lipase | Xylanase

Maltogenic Amylase Transglutaminase (TG) | DATEM

SSL | CSL | Lecithin

Mono and Diglycerides | L-cysteine

Vital gluten | Flour Defatted Soy

Ascorbic Acid | Calcium peroxide

Flour Fortification

Flour is considered a vehicle for nationwide Nutritional Improvement (NI) programs as per WHO/WFP guidelines to address nutritional deficiencies across the whole population. Our customized premixes blend perfectly well with flour and delivers the nutritional benefits essential for a healthy life. Milling companies draw on our technical assistance and wide knowledge in flour fortification. We are proud to be the main partners to all flour mills in KSA providing regulatory and technical assistance alongside high-value premixes with all needed vitamins and minerals.

Pharma & Dietary Supplements

Pharma and dietary supplements industry players comply with the highest quality norms and standards regulated by SFDA. We offer Active Pharmaceutical Ingredients (API) with CEP and DMF files that allow our key pharma customers to respond to the most stringent regulatory requirements in the registration process. Our partner's team of experts accompany our valued customers across all stages of product development and marketing.

Vitamins in different product forms

Vitamin A (Acetate and Palmitate)
Vitamin E (dl-alpha-tocopherol)
Vitamin D3 (Cholecalciferol)
Vitamin K1 (Phylloquinone)
Vitamin B1 (Thiamine mononitrate and Hydrochloride)
Vitamin B2 (Riboflavin)
Vitamin B3 (Niacinamide)
Vitamin B5 (Pantothenate)
Vitamin B6 (Pyridoxine)
Vitamin B7 (Biotin)
Vitamin B9 (Folic Acid & Metafolin)
Vitamin B12 (Cyanocobalamin)
Vitamin C (Ascorbic Acid, Sodium Ascorbate)

Nutritional Lipids

They are available as algae-based and fish based in oil and powder forms.
Omega 3 (DHASCO) in various product forms and concentrations
Omega 6 (ARASCO) in various product forms and concentrations

Neutraceuticals

Lutein | Astaxanthin / Zeaxanthin
Co-enzyme Q10 | Metafolin
Dairy-based peptides
Transveratrol Genistein
Canola/Rapeseed plant protein
Essential oils

Enzymes

Lactase
Glucanase

Early Life Nutrition

Baby Food is essential for brain and body development of new-born. It accompanies the growing-up kids during all stages of growth. We offer single ingredients as well as premixes that support the nutritional needs of babies across their development journey.

Such premixes include vitamins, minerals, amino-acids, prebiotics, probiotics, post-biotics and many more...

We design and formulate customized premixes for all baby food industry key players including multinational companies acting in the local market.

Some of our ingredients aside from tailored premixes:

- HMO (Human Milk Oligosaccharide)
- Sodium Ascorbate
- Lactose
- Short-chain inulin
- Fructo oligosaccharides (FOS)
- Galacto oligosaccharides (GOS)
- Omega3- (DHASCO/ ARASCO)

Personal Care

External look whether skin or hair is part of a human being's identity and image. We provide a wide portfolio of skin and hair actives that impart tangible benefits when added to creams, lotions, serums, gels, shampoo, and other beauty products.

Skin Care

The product mix we provide imparts a wide variety of benefits; antioxidants, stress-reducing ingredients, environmental protection, line & wrinkle refinement, even skin tone and glow, luminosity and brightness, skin rejuvenation and ageing prevention, skin sensitivity and comfort recovery, and skin moisturizing and barrier protection.

Here is the skin actives product range:

Allantoin | Co-Enzyme Q10 | Alpha Arbutin | Argan Oil
Hydroxystearic Acid | Biphenyl Azepanyl Methanone
Cephalins | Hydrolyzed Rice Protein | Superoxide Dismutase | Collagen
Glycine and Valine | Erythulose | Sodium Hyaluronate | Hyaluronic Acid

In addition, we supply a wide portfolio of bioactive organic plant extracts from Swiss Alpine plants under the ALPAFLOR brand:

Yarrow | Lady's mantle
White genepi | Butterfly bush | Alpine Willowherb | Edelweiss | Alpine flax | Mallow | White horehound | Balm mint
Peppermint | Masterwort | Primula
Elder flowers | Alpine skullcap, Thyme | Speedwell | Herb...etc

Sun Protection

There is a rising concern among consumers on sun protection against UVA and UVB and blue light.

We provide the most extensive range of sunscreen filters under the brand name: PARSOL

PARSOL 1789	Butyl Methoxydibenzoylmethane
PARSOL EHS	Ethylhexyl Salicylate
PARSOL HMS	Homosalate
PARSOL HS	Phenylbenzimidazole Sulfonic Acid
PARSOL MAX	Methylene Bis-Benzotriazolyl

Tetramethylbutylphenol (MBBT)	
PARSOL SHIEL	Bis-Ethylhexyloxyphenol Methoxyphenyl Triazine (BEMT)
PARSOL SLX	Polysilicone15-
PARSOL TX	Titanium Dioxide, Silica, Dimethicone
PARSOL 340	Octocrylene

Scalp and Hair Care

The product mix we offer generates visible benefits to scalp and hair such as anti-breakage, anti-frizz, anti-greying, color protection, conditioning, hair loss and flaking reduction, hair strengthening, hair thickening, shine, split-ends reduction, volume and many more

Here is the hair actives range:

Leontopodium Alpinum Flower
Leaf Extract
Saccharide Isomerate
Stem Extract
Argan Oil
Hydrolyzed Rice Protein
Evening primrose
Phytaluronate
Phytantriol
Hydrolyzed Sericin
Shea Butter Extract + Argania Spinosa Kernel Oil,
Tocopherol
Propanediol
Polyquaternium 6
Polyquaternium 22

Vitamins

Niacinamide,
Calcium Pantothenate
Ascorbic Acid
Sodium Ascorbyl Phosphate
Tocopheryl Acetate
Pyridoxine Hydrochloride
Ethyl Panthenol
Panthenol
Biotin

We guide our customers with formulations to obtain the best synergistic effects on SPF.
Our partner's labs also offer analysis of finished products to check the SPF level in
different sun care applications.
